SOFTWARE ENGINEER

Full Stack Software Engineer with experience using frontend and backend technologies such as Ruby, Rails, JavaScript, React, and Nextjs. I pride myself on my strong collaboration and problem-solving skills, adaptability, innovative ideas, and creativity for accomplishing robust projects. Constantly learning new techniques and staying current with the ever-evolving technologies of the industry by contributing to open source projects, and building applications solo.

TECHNICAL SKILLS

Full Stack Web Development, HTML, CSS, Tailwind, JavaScript, React, Ruby, Rails, Nextjs, SQL, PostgreSQL, ActiveRecord, Git, Heroku

TECHNICAL PROJECTS

Donation Bin - [Github](#)

Online marketplace that allows users to donate or pick up items

- Implemented technologies like AWS S3 and Active Storage to allow easy user-uploaded image files
- Integrated Emailjs to open up a secure line of communication between users
- Modeled user authentication system using password encryption gem Bcrypt
- Designed UI from scratch with CSS library Tailwind

YouTube Clone - [Github](#) | [Demo](#)

Watch videos, view channel details, and explore categories in this familiar app

- Structured front-end with Material UI to provide a sleek and easy user experience
- Integrated React-player for seamless and speedy video-watching
- Composed fetch request calls to RapidAPI for video, channel, search, and recommended data

Chat Messenger - [Github](#)

Real-time chat application which allows users to create and customize group chats

- Created back-end routes and serializers to direct data to the front-end
- Utilized sessions and cookies to implement a user authentication system
- Managed project's CSS styling for a polished, professional look

Instagram Clone - [Github](#)

Recreated the functionality of Instagram including uploading images, liking posts, and posting comments

- Designed a method to organize data without the use of a back-end
- Worked with Bootstrap to emulate the feel of Instagram's user experience
- Fabricated UI elements using CSS to enhance app's usability
